

GE Predix - Open Source IoT Platform

Listing details

Reference Number: RF122018

Common

Price: \$ 0.00
Country: United States
Description:

GE's PaaS (Platform as a Service) software for industrial IoT is based on Cloud Foundry. It adds asset management, device security, and real-time, predictive analytics, and supports heterogeneous data acquisition, storage, and access. GE Predix, which GE developed for its own operations, has become one of the most successful of the enterprise IoT platforms, with about \$6 billion in revenues. GE recently partnered with HPE, which will integrate Predix within its own services.

Predix delivers the industrial intelligence you need to transform your operations and generate new revenues. Combining sophisticated asset modeling, big data processing, analytics, and applications, Predix provides the IT foundation for tomorrow's industrial operations.

Features:

Edge-to-cloud Platform
Digital Twin
Analytics and mMachine Learning
Applications Catalog
Security
Developer Productivity
