GAMEMAX 850W 80 Plus Gold Power Supply, ATX 3.0 & PCIE 5.0 Ready, 100% Japanese Capacitors, Fully Modular, ARGB SYNC with Motherboard, RGB-850 Pro

Are you in need of a powerful and dependable power supply unit for your gaming rig or high-performance PC? Look no further than the **GAMEMAX 850W 80 Plus Gold Power Supply**. This fully modular power supply is designed to meet the demands of gamers, content creators, and PC enthusiasts. With its impressive features and top-notch performance, it's a must-have component for your system.

Key Features:

- 1. 850 Watts of Power:** The GAMEMAX 850W PSU delivers a robust 850 watts of continuous power, providing ample juice for even the most power-hungry components, including high-end graphics cards and processors.
- 2. 80 Plus Gold Certified:** Enjoy energy efficiency and cost savings with the 80 Plus Gold certification, which ensures that this PSU operates at high efficiency levels, reducing heat generation and power consumption.
- 3. Fully Modular Design:** Say goodbye to cable clutter and enjoy clean and organized cable management. The fully modular design allows you to connect only the cables you need, making installation a breeze and improving airflow within your PC case.

4. 100% Japanese Capacitors: Trust in the reliability of this power supply, featuring high-quality Japanese capacitors known for their durability and stability, ensuring consistent power delivery to your components.

5. ARGB SYNC with Motherboard: Elevate your PC's aesthetics with customizable ARGB lighting that syncs with your motherboard's lighting software. Personalize your system's look to match your style.
