Description:

SparkFun Tinker Kit

The SparkFun Tinker Kit (STK) is a great way to get started with programming and hardware interaction with the Arduino programming language. The STK is the newest version of the former SparkFun Mini Inventor's Kit, blended with elements of educator MESA kit.

Each SparkFun Tinker Kit includes everything you need to complete 11 circuits that will teach you how to blink an LED, read sensors, drive servos, and more. You don't need any previous programming or electronics experience to use this kit.

The online STK Experiment Guide (in the Documents section below) contains step-by-step instructions of how to connect each circuit with the included parts. This miniature version of the SIK will help prove that anyone can (and should) play around with cutting-edge electronics in a fun and playful way while not breaking the bank.
