Description:

SparkFun Digital Sandbox Lab Pack

The Digital Sandbox Lab Pack includes 10 complete Sandbox kits and 10 add-on packs. The kit has everything you need including the Digital Sandbox main board, hardware, extra components and kit guides. Each DS also includes everything you need to complete 16 circuits that will teach you how to controlling an LED, measuring how loud things are, drive motors, and more. Think of this as a SparkFun Inventor's Kit all in one board!

The full-color Digital Sandbox Guide (included) contains step by step instructions of how to connect each circuit with the included parts. Full example code is provided and explained and even includes troubleshooting tips if something goes wrong. The kit does not require any soldering and is recommended for beginners ages 8 and up.
