

IBM TJBot - A Watson Maker Kit

Listing details

Reference Number: RF126839

Common

Price: \$ 125.00

Country: United States

Description:

IBM TJBot - A Watson Maker Kit

Have some fun coding your very own AI robot with TJBot, a do-it-yourself template to learn, experiment with and explore AI with IBM Watson. The project consists of open source step-by-step recipes or coding instructions, designed for a Raspberry Pi to help you connect your TJBot to Watson developer services.

Born at IBM Research as an experiment to develop best practices in the design and implementation of AI and cognitive objects, TJBot is an example of “embodied cognition” — the idea of embedding artificial intelligence into objects in our everyday lives.

Includes:

TJBot Laser Cut Cardboard

Raspberry Pi Model 3

16GB NOOBS Card

USB Microphone

Speaker

Servo

LEDs

Wires

USB Cable
