

SparkFun myDAQ Protoboard Kit

Listing details

Reference Number: RF170719

Common

Price: \$ 29.95

Country: United States

Description:

SparkFun myDAQ Protoboard Kit

This kit is designed to connect directly to the National Instruments myDAQ measurement and control tool. The board consists of a prototyping space with GND and 5V rails as well as each I/O line from the myDAQ broken out to standard 0.1" pitched headers.

In addition, a breadboard is included with adhesive backing which can be mounted over the prototyping area for solderless prototyping. All of the myDAQ I/O lines are also broken out to female headers to make breadboarding with jumper wires simpler.

Includes:

Protoboard with myDAQ Terminal Block and Female Headers

Clear Self-Adhesive Breadboard

4 x Silicone Bumper Feet
