

BITalino (r)evolution Board Kit

Listing details

Reference Number: RF174683

Common

Price: \$ 209.95

Country: United States

Description:

BITalino (r)evolution Board Kit

This is the BITalino (r)evolution Board Kit, a (comparatively) low-cost biomedical data acquisition dev board that allows you to create projects using physiological sensors and tools.

Each BITalino is presented in a “ProtoSnap style,” enabling it to be programmed as a whole board or snapped apart for use in future projects. This dev board also has no shortage of programming APIs, which include Arduino, Python, Java, Android, iOS and more.

Features:

- 1x BITalino board
- 1x 3-lead accessory (for EMG/ECG/EEG)
- 1x 2-lead accessory (for EDA)
- 5x Pre-gelled electrodes
- 1x LiPo battery (3.7V, 500mAh)
