

## Discovery Kit for IoT On Board Sensors, WiFi, BLE

### Listing details

Reference Number: RF280658

#### Common

Price: \$ 59.75  
Country: United States  
Description:

#### Discovery Kit for IoT On Board Sensors, WiFi, BLE & NFC

This discovery kit is ideal for when you want to learn about and develop solutions for the IoT and applications involving direct connection to cloud servers. By exploiting low-power multi-channel communications, multiway sensing, and the STM32L4 microcontroller, the kit enables a diversity of applications.

#### Features:

- Operating frequency 915MHz
- 64-Mbit Quad-SPI Flash memory
- Dynamic NFC tag based on M24SR with its printed NFC antenna
- 2x Push-buttons (user and reset)
- USB OTG FS with Micro-AB connector
- Expansion connectors Arduino Uno V3 and PMOD
- Power supply ST LINK USB VBUS or external source
- On-board ST-LINK/V2-1 debugger/programmer
- Comprehensive free software HAL library
- ARM mbed Enabled
