Description:

Orangepip Mega2560 Arduino Mega2560 Compatible Development Board

The Orangepip Mega2560 is an Arduino Mega2560 compatible development board based around the ATmega2560 microcontroller. The board features 54x digital I/O pins (14 of which may be used as PWM outputs), 16 analog inputs, 4x UARTs (hardware serial ports) and a 16MHz crystal oscillator. The board is simple to use, just requiring connection to a computer via USB to get started.

Features

256KB FLASH memory

Clock speed 16 MHz

USB Port

Power jack

Can be powered by battery

ICSP header

Reset button
