

Seeed 113030009 GPRS Shield with Antenna and External SIM Holder V3.0

Listing details

Reference Number: RF174326

Common

Price: \$ 46.56

Country: United Kingdom

Description:

Seeed 113030009 GPRS Shield with Antenna and External SIM Holder V3.0

The GPRS Shield from Seeed Studio is an Arduino shield with quad-band support for the 850/900/1800/1900MHz bands and TCP/UDP protocols. The shield has a SIM socket and is supplied with an external antenna. Fit your SIM into the socket and your Arduino is ready to send and receive texts. A library is available on Github to simplify the process.

Features:

GSM/GPRS access from Arduino
Low power sleep mode (only 1.5mA)
2-in-1 headset jack
Uses standard AT command set
