

IEEE Annual Green Technologies Conference 2018

Listing details

Reference Number: RF201080

Common

Description:

IEEE Annual Green Technologies Conference 2018

Theme: "Smart City"

The IEEE Green Technologies Conference (GreenTech) was conceived to address one of the most pressing challenges of our time—securing green and clean energy sources for the 21st century to protect the environment and help build a more resilient power grid.

The conference program address relevant topics of interest including:

- Lessons learned from Global Smart Cities from Iskandar, Malaysia, Sweden, EU funded smart cities projects, Mexico, Dallas, Austin and many others
- The future of Autonomous Vehicles and Autonomous Vehicle Infrastructure
- Distributed Grids and energy infrastructure for sustainability
- Enabling technologies such as block-chain for securing software and IoT devices supply chain, AI – For actionable intelligence, 5G and IPv6
- Smart city applications from metering, to lighting, to parking
- Opportunities and challenges in Human-centered Design for Smart Cities.

Venue: Austin, TX [Location Map](#)

Date: 4 - 6 April, 2018
