

ST NUCLEO-F303K8 Nucleo Development Board

Listing details

Reference Number: RF190398

Common

Price: \$ 12.06

Country: United Arab Emirates

Description:

ST NUCLEO-F303K8 Nucleo Development Board STM32F3 Series Arduino Compatible

From the STM32F3 series, this STM Nucleo development board features the STM32F303K8T6 microcontroller and is a highly affordable and flexible Arduino compatible development board that allows you to try out new ideas, create prototypes and refine designs.

The board gives a combination of performance, power consumption and features that will suit your development requirements.

Features

- Features an STM32F303K8T6 MCU
- 512Kbytes Flash memory
- Arduino Uno V3 and ST morpho connectivity
- ARM mbed
- Onboard debugger/programmer
- Power via USB, VBUS or external supply
- LED Status indication
- User and reset pushbuttons
- USB re-enumeration capability
- Support for a wide choice of IDEs
