Description:
Nordic IoT Week Finland - April 16-20, 2018

In the search for economic competitiveness and growth, IoT is one of the more urgent questions for Finland and the Nordic countries. It can help companies both in increasing their operational efficiency and reducing costs, as well as providing sources of organizational growth. Join and become part of the discussion at the leading Internet of Things event in the Nordic.

The core themes of the conference are:

AI and machine learning
Industrial Internet of Things
Efficiency vs. sustainability
Connected transportation
Innovative platforms and ecosystems
5G and new possibilities
Smart cities and smart homes
Service design and user experience
Disruptive business models
