#### Common

Description:

#### **ICIOT 2018 Seattle, USA - June 25-30, 2018**

With the rapid advancements of mobile Internet, cloud computing and Big Data, device-centric traditional Internet of Things is now moving into a new era termed the Internet of Things Services (IOTS). In this era, sensors and other types of sensing devices, wired and wireless networks, platforms and tools, data processing/visualization/analysis and integration engines, and other components of traditional IoT are interconnected through innovative services to realize the value of connected things, people, and virtual Internet spaces. The way of building new IoT applications is changing. We need creative thinking, long-term visions, and innovative methodologies to respond to such a change.
