

ACM/IEEE International Conference Orlando - April 17-20, 2018

Listing details

Reference Number: RF183748

Common

Description:

ACM/IEEE International Conference Orlando - April 17-20, 2018

This is the third ACM/IEEE International Conference on Internet of Things Design and Implementation (IoTDI). IoTDI is colocated in even years with IEEE IC2E and in odd years with CPS Week. Topics address the entire IoT ecosystem, including cloud and edge computing, data analytics, sensor networks, mobile devices, Internet architecture, middleware, and IoT applications.

Reason to attend: You're an engineer and you have zero tolerance for marketing fluff and executive briefs. You want an IoT conference full of red meat for real engineers. This is it.

Date: April 17-20, 2018
