Job Description:

Job Description:

5+ years of practical experience in embedded product development for networking equipment (wired or wireless), IoT, M2M technology or equivalent.

Requires strong C programming experience, good understanding of algorithms and data structures and excellent software design skills.

Demonstrated experience in communication & application protocols such as WebSockets, TCP, UDP, MQTT, HTTP(S) and Serial data (RS232, 485, USB, etc) and stacks such as NetX.

Advanced knowledge of multi-threaded embedded application software including but not limited to network protocol stacks and implementing communication systems from the ground up.

Experience with RTOS & SDK environments such as ThreadX. Experience with Broadcom/Cypress WICED a big plus.

Experience in leading the development and release of embedded software products is desirable.

Experience with Agile development methodologies (Scrum, XP) a plus.

Effective written and verbal communication skills.
