

WolkAbout IoT Platform

Listing details

Reference Number: RF707730

Common

Price: \$ 36.00

Country: United States

Description:

WolkAbout IoT Platform is a powerful IoT application enablement platform designed to help you quickly and securely connect, manage, monitor and control disparate devices, transform real-time readings into meaningful data and combine different devices and services into a complete IoT solution. It includes all of the functionalities needed to navigate data-to-application integration without requiring years of IoT expertise. WolkAbout IoT Platform uses open communication standards like REST and MQTT to provide connectivity from one to thousands of devices

WolkAbout IoT Platform is used for a wide range of connected industry use cases:

- Unified factory-wide interconnectivity
- End-to-end operational visibility & process automation
- Multi-site remote asset monitoring
- Remote equipment management
- Real-time workforce tracking
- Failure mitigation & safety control

WolkAbout IoT Platform is used for a wide range of smart healthcare use cases:

- Remote tracking of patient's health statistics
- Chronic disease management
- Medical equipment monitoring & maintenance
- Remote tracking & management of the hospital inventory
- Cold chain monitoring (ensuring the quality of vaccines)
- Emergency transport management via connected ambulances
- Assisted living & disability support

WolkAbout IoT Platform is used for a wide range of smart farming use cases:

- Sensor-based field & resource mapping
- Remote soil quality & crop monitoring
- Multi-site remote equipment monitoring
- Environmental monitoring & control
- Livestock tracking & geofencing
- Smart watering, irrigation & fertilisation
- Greenhouse monitoring & automation system
- Monitoring indoor facilities (silos, dairies & stables)
- Smart warehousing, logistics & distribution
