

Raspberry Pi Zero W

Listing details

Reference Number: RF107229

Common

Price: \$ 11.15

Country: India

Description:

If you didn't think that the Raspberry Pi Zero could possibly get any better, then boy do we have a pleasant surprise for you! The new **Raspberry Pi Zero W** offers all the benefits of the Pi Zero v1.3, but with one big difference – **built-in WiFi!**

More specifically, this giant upgrade is the addition of a BCM43143 WiFi chip BUILT-IN to your Raspberry Pi Zero – just like the Pi 3! No more pesky WiFi adapters - this Pi is WiFi ready. There's also Bluetooth Low Energy (BLE) on board making the Pi an excellent IoT solution (BLE support is still in the works, software-wise).

We also have a **essentials bundle** with all the essentials to get your Zero W up and running.

At first glance, the Pi Zero W looks just like the Raspberry Pi Zero v1.3 we know and love. But when we started to think of the added convenience of not having to worry about hooking up a WiFi dongle or Ethernet cable and what a well-chosen set of accessories could add we realized the appeal. And then we saw the price...could it be true? Yes!

This is the slimmest, most pared down Raspberry Pi to date. It's kind of like the little cousin to the Pi 3 - with just a micro SD card slot, a mini HDMI port, two micro USB ports (one for power, one for USB), and 512MB of RAM. It has a single-core 1 GHz processor chip, similar to the Pi A+ and B+.
