WHACKY WHEELS KIT - Kids IoT Project Kit

Listing details

Reference Number:	RF826473

Common

Price:	$ 39.95
Country:	United States
Description:	

Wheels drive cars and trucks and bikes. But they can also move bridges, turn Ferris wheels, and open gates wide. How crazy are *your* creations when you add wheels? With the Whacky Wheels kit, you're the driver! Each Circuit Cubes kit comes complete with everything you need to make the suggested projects, including the Motor, Battery, and LED Cubes.

Includes paper car templates for:

• Underwater rover
• Space rover
• Parade float
• Monster truck
• Design your own

The fun doesn't end when you complete all of the kit projects—view other Whacky Wheels project ideas!

SAFETY TIPS

- **Don't overcharge**. Overcharging can cause the battery to rupture, overheat, catch fire, or even explode.
- **Don't damage.** An impact that causes a dent or puncture in the battery could result in a dangerous situation. Don't charge a damaged battery. Discard swollen batteries
- **Stay nearby**. Don't leave a charging battery unattended.
- **Store properly**. Avoid storing your battery in direct sunlight, in extreme heat or cold, or under heavy objects.

- **Allow air**. Don't charge near combustible materials.
- **Use common sense**. Don't open or otherwise tamper with your battery or its power adapter.
