Bastille - IoT Security Solution

Listing details

Reference Number:	RF108996

Common

Price:	$ 0.00
Country:	United States
Description:	

Bastille provides full visibility into the Internet of Radios inside an enterprise's corporate airspace. Through patented software-defined radio and machine learning technology, Bastille senses, identifies and localizes threats, providing security teams the ability to accurately quantify risk and mitigate airborne threats that could pose a danger to customer data and network infrastructure.

The Bastille Research Team proactively monitors for new radio-borne threats. Their breakthrough research and discoveries such as MouseJack and KeySniffer help to keep not just Bastille clients, but the larger ecosystem safe. Each month, Bastille Research reports on the most prevalent and most pernicious attacks.
