

Trustwave - Internet of Things Security Solution

Listing details

Reference Number: RF141405

Common

Price: \$ 0.00
Country: United States
Description:

Outfitting more and more inanimate objects with microprocessors and Wi-Fi connectivity and linking those "things" with powerful analytics engines in the cloud is fundamentally altering the way we live and work. But do you hear that pounding? It's attackers pummeling the expanded perimeter but also IT professionals' throbbing headaches.

Controlling the rapid influx of connected devices, the software that makes them functional and the supporting cloud and network infrastructure makes managed security services more important than ever. From "thing" to cloud to app and back - test, monitor and secure your IoT with Trustwave Managed IoT Security.

With more than 20 years of penetration testing, product security assessment and managed security services experience and Trustwave's renowned SpiderLabs® team at the forefront of the latest security threats (IoT and otherwise), no other security company can offer such a complete, meticulous IoT assessment and monitoring solution from the physical object to the supporting apps and infrastructure.

Benefits

- Reduce Compromise Risk
- Assure Customers
- Deploy IoT Securely
- Adjust to Your Evolving IoT Strategy
