

GeoIoT World Americas 2019, San Francisco - March 26-28, 2019

Listing details

Reference Number: RF153568

Common

Description:

Run successfully in Europe since 2016, Geo IoT World now launches its Americas edition in San Francisco on March 26-28, 2019. Attend the first Geo IoT World Americas. Over 2 days, Geo IoT World Americas will deliver technology and business insights to leverage new precision location technologies allied with Big Data power in innovative IoT applications. With approximately 5 billion IoT devices critically dependent on Geolocation data by the end of 2020, the prospects are exciting.

Geo IoT World gathers together location, IoT and connected industries leaders along with developers and start-ups. 2019 key topics include geo-aware and enabling technologies, automotive and smart mobility, connected business, and Geo IoT in Healthcare.
