

INTERNET OF THINGS EXPO (IOTX), 1 – 3 April, 2019 Dubai World Trade Centre, UAE

Listing details

Reference Number: RF184408

Common

Description:

In the Middle East, the Gulf Cooperation Council (GCC) countries will see high adoption of IoT for smart transportation, the report said. There are already examples of integration, like the driverless car powered by solar energy at Masdar City in Abu Dhabi. Similarly, the healthcare market in the region holds huge potential for IoT as new and existing hospitals in the GCC compete to be the most innovative and advanced in the region.

IoT is fuelling growth opportunities across verticals, including automotive, healthcare, energy and manufacturing, among others. Fortunately, we gathered the best companies of all sectors in the GCC to exhibit for you.
