Listing details

Reference Number: RF204928

Common

Description:

NASSCOM Center of Excellence – IoT is pleased to bring to you Connected Vehicle 2019 on 6th-7th March at Radisson Blu, Bengaluru.

India is a fast-emerging market for connected vehicle business, with telematics developing quite promisingly in the country. Due to various factors like availability and affordability of high-speed internet connectivity, smartphone integration via apps, and numerous benefits through industry offerings, the adoption of telematics is increasing among users. Further, as OEMs are incorporating advanced telematics solutions in both the passenger cars and commercial vehicle segments, it is expected to fuel the growth of automotive telematics ecosystem.

In our context, telematics-enabled mobility is the key to the implementation of Intelligent Transportation System, which is expected to drive the future of connected transportation.
