Description:

Big Data & AI Conference is an international event intended to draw all players big and small in the Big Data and AI communities to a 3-day event running from June 27 – 29, 2019, in Dallas, Texas. Day 1 of the 3-day event will be devoted to training sessions and workshops, while the last two days will feature presentations and discussion panels spanning technical, business and legal aspects of Big Data, AI and AI-related fields.

Broadly, the goal of the plenary conference sessions is to provide a forum where company and institutional representatives share the current state of adoption of Big Data and AI technologies in their organizations, what their future trajectories are and the consequences to humans and human activities.

Talks and workshops will cover the following topics:

IoT and Smart Cities

Big Data and Analytics

Machine Learning

Deep Learning

date:27 June 2019 08:00 - 29 June 2019 17:00
