Description:

Energy Forum 2K19, which is organised by Lexis Group of Conferences, welcomes you to attend the Conference in “London, UK during September 18-19, 2019. The meet will focus on the theme “Doubling the Global rate of Improvement in Energy Technology”.

Energy Forum assures its attendees of a platform, perfect for the exchange and sharing of invaluable knowledge, research findings and experiences that can happen with clarity as that of a crystal. Energy in Technological innovation can be a great enabler for development in low and middle-income countries. This course presents a methodology and an approach to develop impactful innovations that have the power to foster sustainable development.

The future of energy is brilliant, as innovative headways keep on being made, assets keep on being revealed, and STEM activities keep on developing. Attending energy meetings is outstanding amongst other approaches to remain fully informed regarding the most recent headways in energy and to share your challenges and find out about solutions from industry pioneers. Our event picks highlight creative projects, driving associations, and solutions for meeting increasing demands and wellbeing concerns.
