

IoT Evolution Expo 2018

Listing details

Reference Number: RF122976

Common

Description:

IoT Evolution will highlight how IoT technologies and the wireless network can be utilized to significantly improve business processes, minimize risk, spur innovation, and drive revenue. IoT Evolution highlights IoT applications within all vertical markets and will concentrate on specific applications within the supply chain, transportation, energy and healthcare sectors.

Members of the IoT ecosystem, including wireless carriers, application providers, platform companies, and device manufacturers will discuss their roles in creating effective technologies and procedures that work to create an ecosystem for actionable data, information and efficiencies. IoT Evolution will show attendees how they can utilize IoT technologies in enterprise business applications including supply chain management and mobile workforce applications, for smart home and smart building applications, energy management, mobile healthcare and more. Understand how IoT will take enterprise business processes, healthcare and smart energy to the next level.

Special Events:

- Only at IoT Evolution
- Conference Party
- Enterprise IoT
- IoT Certification Series
- IoT Connectivity Showcase
- IoT in the Channel
- Case Study Theatre
