DESCRIPTION

Thermal Printer Project Pack

Based around the Raspberry Pi board, the Adafruit IoT Pi Printer Project Pack is a fun way to incorporate your Raspberry Pi device into a wireless printer. Featuring a variety of inherent print options such as sudoku puzzles, black-and-white images, tweets or weather reports, the IoT Pi Printer Project Pack is also capable of running whatever Python-based code you can imagine for your new printer!

Features:

  - Laser-cut casing and associated fasteners

  - 1 Mini receipt printer

  - 1 50-ft spool of BPA-free printer paper

  - 1 5 V, 4 A power adapter

  - 1 2.1 mm panel jack

  - 1 White LED-lit, Rugged metal pushbutton

  - 1 8 GB microSD card w/ adapter and NOOBS 2.0

- 1 4700 µF electrolytic capacitor

- 20 multicolored jumper wires
