

Thunderboard Sense 2 IoT Development Kit SLTB004A

Listing details

Reference Number: RF509020

Common

Price: Rs 19.99

Posted: 4 years ago

Description:

The Thunderboard sense 2 has a variety of on-board sensors that can provide the fastest path to develop and property your next IoT project/product. Use the Thunderboard Sense 2 to use its sensors to measure and collect motion, environmental and bio-metric data that is all watchable on your Android or iPhone smartphone with the Thunderboard app.

This Thunderboard sense has 4 times more Flash (1024 kB) and RAM (256 kB) than the original Thunderboard sense and has an added advance BLE capabilities, giving it a wide range of IoT capabilities. It includes a 2.4 GHz ceramic chip antenna for communication and four high brightness controllable LEDs/push buttons.

Features:

Wireless Gecko EFR32™:

- Wireless SoC with multi-protocol radio and 38.4 MHz operating frequency
- ARM® Cortex® M4 core with 256 kB RAM and 1024 kB Flash, Low Energy Consumption
- Flexible MCU peripheral interfaces
- 2.4 GHz ceramic chip antenna
