

Arduino Mkr Iot Bundle (Original Kit From Arduino)

Listing details

Reference Number: RF721809

Common

Price: Rs 6,849.00

Posted: 4 years ago

Description:

The MKR IoT Bundle using the Arduino MKR1000 for IoT applications. The MKR IoT bundle includes a selection of the most common and useful electronic components to build 5 IoT experiments. The kit is based around the MKR1000 a powerful board that combines the functionality of the Zero and the Wi-Fi Shield and enables Makers to add connectivity to their designs with minimal prior networking experience.

Note: Don't connect 9V to the board, as it will be damaged. You can use the 9v Battery strip to supply an external component.

Features of Arduino Mkr Iot Bundle

MKR1000 combines the functionality of the Zero and the Wi-Fi Shield

MKR1000 is based on the Atmel ATSAMW25 SoC

Operating Voltage: 3.3V

Arduino MKR1000 is able to run with or without the Li-Po battery
