Description:

Hey, Google How is today's weather?
Ok Google, What is today's news update?
Hey Google, Call Miss. Susan

Wonder not, days are coming when we all rely on a gadget that will answer all our everyday queries.

Google Home Voice Controller IOT is an automated electronic device that controls and monitors every electronic connected gadget in your home premises. It is a WIFI-connected, voice-controlled smart speaker capable of playing music and answering questions.

Google Home Voice Controller Features:

Google Home voice Controller captures verbal commands and interacts with and control the connected devices and gives verbal response to the querier.

How do we use Google Home Voice Controller?

As long as there is a steady and strong internet connection and power for the Google Home Voice Controller IOT, the device will be working. The gadget starts on the triggering words – Hey Google or OK Google. Once it captures the triggering words it will start answering all your questions.

Google Home Voice Controller Pros & Cons:

Pros: Google Home Voice Controller identifies vocal messages and replies in words. So, whatever you asked verbally will be answered verbally. We can make calls, instruct, and control connected devices, play music, hear news...

Cons: You can't send any images or videos through Google Home Voice Controller. Even you can't play

any games or watch movies. And there is a fee to avail of some services in Google Home Voice Controller.

Google Home Voice Controller Price:

Aed 569 (Price may vary and tend to change depending upon the color and size of the product)
