

# Amazon Echo Plus Voice Controller IOT

## Listing details

Reference Number: RF148024

### Common

Price: \$ 99.99

Country: United States

Description:

Amazon Echo Plus Voice Controller is a popular and reliable IoT device. Echo Plus connects to Alexa to provide information, make calls or announcements, listen to music, read the news, check the weather, shopping lists and so on.

### Amazon Echo Plus Voice Controller Features:

It has around 6-7 microphones, good technical specifications and sound cancellation.

Amazon Echo can play songs, connect to external speakers or headphones.

Controls compatible smart home devices including lights and plugs.

## How to operate Amazon Echo

Echo connects to the Internet via home WiFi network. Once we input a spoken command, the device gathers the voice commands that follow and sends them to a natural voice recognition service in the cloud called Alexa Voice Service. An Echo device listens at all times, and only responds when a user addresses it directly with one of the wake words such as "What's the weather forecast?" or "Add this to my shopping list etc.
