

## Particle Photon Wi-Fi with Headers IOT

### Listing details

Reference Number: RF171409

#### Common

Price: \$ 19.00

Country: China

Description:

Particle's IoT, the Photon, provides everything you need to build a connected project. It has a powerful 120MHz ARM Cortex M3 microcontroller with a Broadcom WiFi chip in a tiny thumbnail-sized module called the PØ (P-Zero). It makes prototyping simple and easy due to plugins. The Particle Cloud has some great features for building connected projects, including over-the-air firmware updates.

#### Particle Photon Wi-Fi with Headers Features:

It has particle WIFI module and RGB LED

It comes with a real-time operating system

It has an open source design

It also has pre-soldered headers

#### Particle Photon Wi-Fi with Headers Price:

US \$ 19 to US \$ 25
