

The Edge Computing Expo North America, 17-18 May 2023

Listing details

Reference Number: RF120023

Common

Description:

More Info:

The Edge Computing Expo North America is a two-day conference at the Santa Clara Convention Centre in California and virtually via the event's app. It consists of top-level content and thought leadership discussions exploring the Edge Computing ecosystem. Edge computing can enable a significant increase in operational efficiency and automation, while dramatically reducing latency.

The Edge Computing Expo is co-located with Digital Transformation Week North America, IoT Tech Expo, AI & Big Data Expo, Blockchain Expo, 5G Expo and Cyber Security & Cloud Expo. It will provide insight and strategies for technology decision-makers seeking to explore and evaluate thought-leadership topics and valuable strategies to drive businesses forward.

The Expo is perfect for those technology professionals making investment and strategy decisions, building & executing pioneering projects within their organisation.

Who Attends?

Over 5,000 attendees are expected to join from across the globe including:

- IT Directors
- Telecom Providers
- Developers
- Start-Up's
- OEM's
- Government
- Automotive
- Operators
- Technology Providers

Investors
CTO's
Heads of Innovation and Technology
VCs

Key topics include:

Effective partnership models
The importance of edge computing as a key pillar
Business wins enabled by the intelligent edge
Using AI to increase the performance of edge devices
Creating best practice roadmaps

The Expo is co-located with Digital Transformation Week North America, IoT Tech Expo, AI & Big Data Expo, Blockchain Expo, 5G Expo and Cyber Security & Cloud Expo and so on.
